Hello,

        Yesterday  I was disconnected my VPN connection at 19:00 IST
,So today Could you tell me the time to test the data transfer interface.
        Once i got the mail from you,I ll connect the VPN connection.

Thanks and Regards.,
K.VINOTH

  Hallo,
  We connected to trelleborg VPN then try to connect to KVINOTH server being
  inside Trelleborg network. We can not get access to KVINOTH SQL server

where

  interface table should be placed.

  The instructions for VPN you send us are  not clear - what we should use

it

  for.? We already use Cisco VPN client.  We can not connect to SQL server

by

  using IP: "10.56.18.71/24 via 10.56.18.254" or "KVINOTH" being inside
  Trelleborg VPN!

  Please make your SQL server visible inside Trelleborg network so we can
  connect to it for data transfer. Or please ask trelleborg IT people to
  create the test database on Some SQL server (not MixCont!). So we simply
  replicate to this DB.

        As we told, first we try to get connection to DB and interface table
to
        check it corresponds to our export format.

        Will test in few minutes

        Hi Stas Brassas ,

        Now the VPN Connection is established.Please could you try to update
data
        with BASE system.
        If you have any quries pls mail me.

                Hallo,

                We can try connection to interface SQL/table today. As soon
        connection is OK
                we fix the next time for replicator test itself.

                Stas Brassas

Hi Stas Brassas ,

We could be available today till 18:30 IST ,for the below
test
exercise .
Once your are available , Pls do send us a mail and Vinoth
would
connect
our system on VPN to Trelleborg Network .

Use ammy admin (remote assistance) software ,to connect our
system
for any
remote desktop assistance view.

with regards,
Suresh Kumar B

Hallo Henrik,

The link to server does not work when we logged to

```
Trelleborg
                network. Ping to Server and IP addresses does not work.

                It might be that Base people are not connected to Trell. net

                permanently, or?

                Please could you ask them connect to Trell. VPN and inform
 us when
                we have to start test replication.  We are in trip up to 8
 th of
        April. On 9
                th of April we can test.

                Kind regards,

                Stas

 Ok I'm waiting for your testing...
 and also VPN is available..
```
